

2017 ANNUAL REPORT

Dumont Lake Level Control Structure

Allegan and Monterey Townships

**TO THE HONORABLE BOARD OF COMMISSIONERS OF THE
COUNTY OF ALLEGAN:**

In compliance with the provision of Section 280.31 of Chapter II, of Act No. 40, of Public Acts of 1956, as amended, I have the honor as the elected Drain Commissioner of said County of Allegan, to submit the 2017 Annual Report covering the period from the 1st day of January, A.D. 2017, to the 31st day of December, A.D. 2017.

2017 Drain Commissioner and Office Staff:

Denise Medemar, Drain Commissioner
Carolynn Parnell, Chief Deputy
Karen Brinks, Deputy
Michael Horgan, Deputy Engineer
Brent Scholten, Maintenance Supervisor
Ron King, Drain Maintenance
Catherine Boysen, Secretary

ALLEGAN COUNTY DRAIN COMMISSIONER

County Courthouse

Telephone: 269.673.0440

Fax: 269.673.0396

Email: dmedemar@allegancounty.org

The Allegan County Drain Commissioner is charged with diverse responsibilities as regulated by several public acts:

THE DRAIN OFFICE

The Michigan Drain Code (Act 40 of Public Acts of 1956, as amended) is the law that governs the responsibilities of the Drain Commissioner. The Drain Commissioner, Denise Medemar, and staff are responsible for the operation and maintenance of more than 820 established county drains and storm water management systems in Allegan County. This Act requires strict adherence in regard to mailings, meetings, and public notification.

In 2017, 261 drains experienced activity, ranging from establishing new drains to inspections and routine maintenance of existing drains. Of those 261 drains, 136 drainage districts were assessed. The total amount assessed, \$1,534,363.10, was spread to 31 of the 35 Allegan County municipalities, the County at large and for road benefits, the Michigan Department of Transportation for State Highway benefits, and the railway systems that traverse our County.

The Drain Office provides Payoff Requests for Drain Special Assessments for parcel owners and title companies as well as providing assistance throughout the county on drains and flood complaints. Any flooding situations should be immediately reported to the Drain Office at (269) 673-0440. Requests for drain maintenance or improvements should also be directed to this number.

DRAIN MAINTENANCE CREW

The Drain Maintenance Crew consists of a Maintenance Supervisor and a Drain Maintenance worker. Maintenance activities by the maintenance crew include ditch bottom cleaning, tree clearing, debris removal, beaver dam removal, erosion repair, herbicide treatment, and repair of broken pipe on a tile drain. Maintenance is accomplished by using hand tools and small power equipment. In 2017, this form of maintenance was completed on 75 drains.

The Earned Release Program (ERP) and Detail Enabling Better Transition to Society (DEBTS) were initiated by the Sheriff's Department as measures to help address jail overcrowding. In 2017, the Drain Maintenance Crew utilized the DEBTS program and cleaned 26 drains. The Drain Maintenance Crew worked on fewer drains in 2017; however, many of the drains cleared were several miles in length. Contractors were hired to clean 49 drains that required larger equipment. Approximately 140 drains in Allegan County and the five adjacent counties of Barry, Kalamazoo, Kent, Ottawa, and Van Buren were inspected or maintained.

BOARD OF PUBLIC WORKS

The Allegan County Board of Public Works was established and organized under Act 185 of 1957, as amended. In Allegan County the Board of Public Works has seven members that include the Drain Commissioner and six other members appointed by the County Board of Commissioners. The Drain Commissioner is the elected Secretary for the Board of Public Works with Drain Office staff providing administrative support.

The majority of our county's municipal water supply and/or sewage collection and disposal systems were constructed and/or improved using the provisions allowed under Act 185. By utilizing the County's bond rating, a local municipality receives more favorable and affordable financing for these types of public works projects. The County of Allegan/Board of Public Works is the owner of record for the project until the incurred debt is paid in full.

In 2017 there were six active debt service accounts that involved ten municipalities. Debt Service payments are billed to and paid biannually by the affected municipalities. A total of \$1,179,314.76 in principal, interest, and fees was collected and paid for the year 2017.

INLAND LAKE LEVEL PROJECTS

Part 307 of the Natural Resources and Environmental Protection Act, (Act 451 of 1994), provides for the determination, establishment, and maintenance of the normal height and level of inland lakes in Michigan. Part 307 also requires inspection every three years of all lake level control structures on inland lakes that have normal levels established under this Act. Inspections must be performed by a licensed professional engineer and a copy of the inspection report must be submitted to the Michigan Department of Environmental Quality.

The County Board of Commissioners delegates administrative duties to the Drain Commissioner to oversee lake level projects and required inspections. Allegan County has six established lake levels: Base Line Lake, Dumont Lake, Miner Lake, Monterey Lake, Osterhout Lake, and Pine Creek Lake.

In 2014 the Circuit Court established a lake level for Dumont Lake. The Drain Office worked with Wightman & Associates to have the dam constructed on Dumont Lake to establish the lake level. The Dumont Lake Level Control Structure was completed in 2017.

INLAND LAKE IMPROVEMENT BOARDS

Part 309 of the Natural Resources and Environmental Protection Act, (Act 451 of 1994), provides for the improvement of certain inland lakes; authorizes the dredging and removal of undesirable materials from lakes; authorizes the payment of improvement costs and related expenses through special assessment to properties within an established district; and specifies the county drain commissioner, or his/her designee, to serve as a member of the lake board.

Allegan County has an established lake improvement board for Gun Lake, Hutchins Lake, Lower Scott Lake and Miner Lake. In Allegan County, lake improvement boards have been established primarily for aquatic plant control and abatement of water quality issues.

MS4 PERMIT

In 2016, the Allegan County Drain Commissioner was required to apply for an NPDES Jurisdictional Permit for storm water discharges from a regulated municipal separate storm sewer system (MS4). This permit required the creation of a Storm Water Management Plan composed of six major sections: Public Education Program, Public Involvement and Participation, Illicit Discharge Elimination Program, Post Construction Storm Water Management Program, Construction Storm Water Runoff Control, and Pollution Prevention/Good Housekeeping Standards.

In 2017, the Michigan Department of Environmental Quality (MDEQ) provided review comments on the Allegan County Drain Commissioner (ACDC) draft plan components. The ACDC has been working to resolve MDEQ's review comments and revise the ACDC Storm Water Management Plan accordingly. Near the end of 2017 most (almost 100%) of the plan components have been revised and approved by MDEQ. We are currently awaiting MDEQ's final approval of Storm Water Management Plan. Approval is anticipated anytime in 2018. While this process is occurring, the ACDC has been implementing portions of the Storm Water Management Plan by conducting storm water inspections.

GENERAL DEVELOPMENTS

There were 12 General Development plans submitted for Storm Water Management Plan review and approval, at the request of various Townships, as follows:

Wolverine Power, Dorr Twp.	McDonald Modular Solutions, Dorr Twp.
Sandy Pines Storm Shelters, Salem Twp.	1200 Central Ave., Fillmore Twp.
Trigon Steel, Fillmore Twp.	143 rd Ave. Development, Fillmore Twp.
Dollar General, Dorr Twp.	Vistacore, Holland City
Southport Trucking, Fillmore Twp.	374 E. 64 th Street, Holland City
3559 136 th Ave., Salem Twp.	Creative Products, Holland City

SITE CONDOMINIUMS

Act 59 of 1978, the Condominium Act, requires that written notice of intent to construct a condominium project be provided to the appropriate city, village, township, or county, the County Road Commission and the County Drain Commissioner. The Drain Commissioner received three storm water management reviews for 2017:

West Wind Lake Estates Ph. 01, Laketown Twp.
West Wind Village, Laketown Twp.
Meadow Argus, Saugatuck Twp.

SUBDIVISION DEVELOPMENT

Public Act 288 of 1967, as amended, the Land Division Act, provides the main regulatory mechanism to ensure that subdivisions meet the standards set by local governmental officials.

The role of the Drain Commissioner under this Act is to ensure that adequate storm water facilities are designed, constructed, and maintained to ensure that landowners within the subdivision are protected from flooding and that the development does not cause an increase in flooding outside of the subdivision.

The Drain Commissioner requires that the plat proprietor/developer provide for adequate storm water facilities. Section 433 of the Michigan Drain Code provides for the construction of a drainage system by the developer to serve a newly established plat and the subsequent establishment of a drainage district in relation to the storm water facility. The drainage system is constructed according to specifications and standards set by the Drain Commissioner. Upon completion the system can then be remanded to the Drain Commissioner as an established county drain using a formal document known as a 433 Agreement. In 2017 one plat was submitted:

Harvest Meadows Phase III

MOBILE HOME PARKS

Public Act 419 of 1976, the Mobile Home Commission Act, requires that a person who desires to develop a mobile home park shall submit a preliminary plan to the appropriate municipality, local health department, county road commission, and county drain commissioner for preliminary approval. The Drain Commissioner shall review and may approve outlet drainage to ensure that development of the proposed mobile home park does not cause flooding offsite. In 2017, The Drain Commissioner received no submissions for review and approval.

SAW GRANT

In December 2017, the Drain Office received notification that the SAW Grant offered through the Michigan Department of Environmental Quality, which we initially submitted in 2013 with Board of Commissioner approval on Thursday, November 14, 2013, was approved. The amount is \$120,000 which the grant will reimburse ninety percent (\$108,000) with a ten percent local match (\$12,000) which has an end date of December 1, 2020. The original application provided funding to clean and televise six drains, provide GIS hardware/software training, and records scanning.

2017 INNOVATION & EXCELLENCE AWARD WINNER

In 2017, the Allegan County Drain Commissioner received the Michigan Association of County Drain Commissioners (MACDC) 2017 Innovation & Excellence Award for the North Shore Drain Drainage District. The 145-acre North Shore Drain Drainage District is a consolidated drainage district that solved three distinct drainage problems within one cohesive project. The three areas were 1) Washington Street; 2) West Wing Estates-Linear Detention; and 3) Euclid, Pershing, and Adams Streets. The engineer for the project was ENG, Inc. and Hoffman Brothers was the contractor.
