

NIMS Training Progress Report

Identify a current, estimated percent of progress towards completion for each of the NIMS/ICS courses listed in the table below. The percent is based on the total number of personnel who have been identified as needing to complete the course and the total number that currently have completed the course.

For example:

200 entry level first responders are to complete the IS-700 course and so far 40 responders have completed it: $40/200 \times 100 = 20\%$ progress toward completing the IS-700.
