

# A Homeowner and Renter's Guide to Safe Cleaning of Lead Paint Chips and Dust

## STEP ONE: Prepare Supplies

1

**Prepare.** Gather rubber gloves, throw-away wipes or towels, garbage bags, spray bottle with soap and water, and mop.

**Use supplies you can throw away.** Use soapy cleaners or products made to remove lead dust.

**Don't use a vacuum unless it is a HEPA vacuum.** A regular vacuum will spread lead dust into the air. Some health departments have HEPA vacuums available to borrow.

## STEP TWO: Remove Paint Chips

2

**Remove paint chips.** Window areas and porches often have peeling paint and lead dust. Pick up the paint chips you can see and throw them away in a plastic bag.

## STEP THREE: Wet & Wipe Surfaces

3

**Always spray window sills with soap and water and wet-mop floors.** Do not use a broom to sweep lead dust. Throw away wipes after cleaning each area.

## STEP FOUR: Mop

4

**Mop** with a disposable mop head or paper towel to wipe away suds.

## STEP FIVE: Clean Often

5

**Change towels often** until no paint chips, dust or dirt can be seen. Put garbage in a plastic bag, and seal with tape or a knot. The sealed bag can be disposed of with normal trash for pickup.

**Repeat these steps weekly,** or when dirt and dust appear on floors, porches, window wells, window sills, stairs or children's play areas.
