Allegan County COVID-19 Dashboard

Negative 2,661 Tests
Total 487 Monitoring
Recovered 83 per MDHHS definition

Positive 185 Tests
Total 27 Hospitalized

Probable 29 Cases
COVID-19 2 related deaths

Percentage of All Cases by Sex
Male 49.28% Female 50.72%

COVID-19 Number of Cases by Age
On average, each person in Michigan with COVID is infecting 0.82 other people. Because each person is infecting less than one other person, the total number of cases in Michigan is shrinking.

Last updated 5/17/2020. Most experts recommend an infection rate of less than 1.0 for two successive weeks before a community is able to start reopening.
Note: As the country continues to learn more about COVID-19, this data will be updated and modified. What is important to note here is the Infection Growth rate is still above 1.0, therefore the spread is continuing.

Data as of 5/17/2020 at 1:50pm. Source: Michigan Disease Surveillance System
Cases by Sex

- Female: 51%
- Male: 49%

Testing Strategies

- **Moonshot Initiative** (Statewide testing strategy)
  - Grand Rapids and Kalamazoo are 2 of 8 areas to increase testing

- **Community Drive Thru** (local testing strategy)
  - Intercare Pullman Drive Thru Testing

**COVID-19 DRIVE-THRU TESTING NOW AVAILABLE**

Call us at **269-686-4546** to get screened

Limited appointments available for Thursdays
Congregate Care Testing

- Congregate Care Testing Strategy

**Congregate Care Testing:**

- Staff, inmates, and/or residents who are symptomatic.
  - Symptoms include cough, shortness of breath or difficulty breathing, fever, chills, muscle pain, sore throat, new loss of taste or smell.
- Staff, inmates, and or residents who are in close contact to a positive COVID-19 case, if they are not wearing appropriate Personal Protective Equipment (PPE).
  - Wait at least 5 days from known exposure to test individual.

**Proactive COVID-19 Mitigation Guidance:**

- First step is to baseline test all staff in a facility initially to determine their current COVID-19 status.
  - Test weekly after baseline testing occurred.
  - Consider baseline testing for all residents/staff.
- Test new youth home residents, new inmates, and new employees as part of the screening on-boarding process.
  - Youth home resident and inmates are to be quarantined until Health Department receives test results. Continue to work with the Health Department on further actions to take.
  - New employees can start work immediately after they get a negative result.

**WHO SHOULD PERFORM TESTING:**

Medical staff from your facility would need to perform the testing. The Allegan County Health Department will collaborate on information, supplies, and other support as needed.

**TESTING SUPPLIES:**

Numerous venues are available to secure testing supplies:

- State strategy includes congregant care settings securing testing supplies through Regional Homeland Security.
- Testing by State Lab is free currently.
